

- Which issues about consistency this paper addresses?
 - Consistency checking and creating repair actions among modeling and implementation tools
- What is the main novel contribution/approach of the paper?
 - Checking and generating repair actions happened incrementally and among different tools
- Do you see any problem with the approach/contribution of the paper?
 - Memory usage and model size?
 - Communication between modeling and implementation tool?
 - Who decides what action to choose?
- What would you suggest to improve the paper's contribution?
 - A discussion about the necessity to generate a complete or partial graph.
